

# Advanced Marketing Portal (AMP)

## AMP Gives You a Front-Row Seat to Monitor the Progress of Your On-line Activities..... Allowing You to Make Decisions a Snap!

Our Advanced Marketing Portal (AMP) allows you to monitor every aspect of information affecting your online search. This information is extremely critical to determine if the online marketing you are doing is working and if you are getting your money's worth.

An easy-to-use reporting tool is included, providing real-time numbers and analytics for your social media and website. It can also monitor and compare your performance in the Google Local 3-Pack and your ranking against competitors in your local market.

Online marketing reviews have a significant impact on businesses. According to a recent study, even a 1/2 star change can result in a revenue difference of up to 19% per month.

Your reputation is crucial, and in this digital age, it's as important as search engine optimization. Negative reviews can harm your reputation. Our platform helps you collect and display reviews on search engines. You can also respond to reviews that require attention, allowing you to turn negative feedback into positive outcomes!

AMP is an insurance policy to protect your reputation and make sure the money you spend is worth it.

We offer several options to suit your business:

- Google Analytics Integration
- Facebook & Twitter Integration among others
- Google Ranking, even on Mobile
- Competitor Tracking
- Comprehensive audits of all your web pages
- Local Search Audit
- Google Business Profile Audit
- Local Keyword Ranking report
- Directory Tracking report (shows errors affecting your search)
- Our Exclusive Reputation Marketing Manager
  - Manage Reviews
  - Build Reviews
- We also offer a Reputation Marketing as a managed service

Multi-location pricing available
