

BroadLocal™ Managed Service Platform

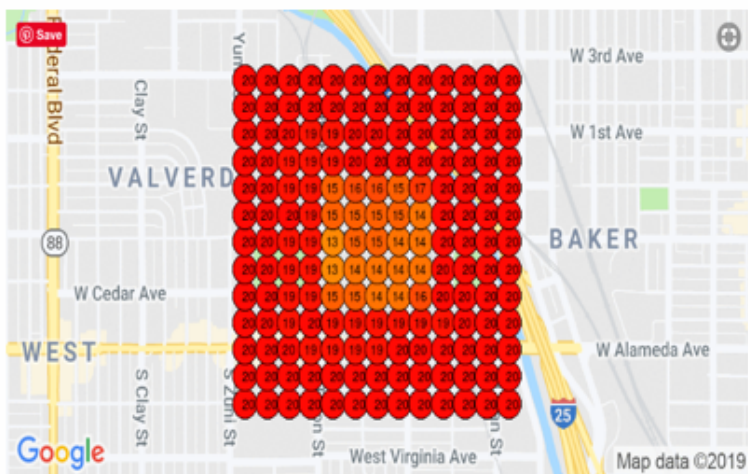

- GPS-Trac (Grid Monitoring)
- 12-Month Contract
- Increase calls & visits

An All-In-One Comprehensive Platform for Managing Local Marketing

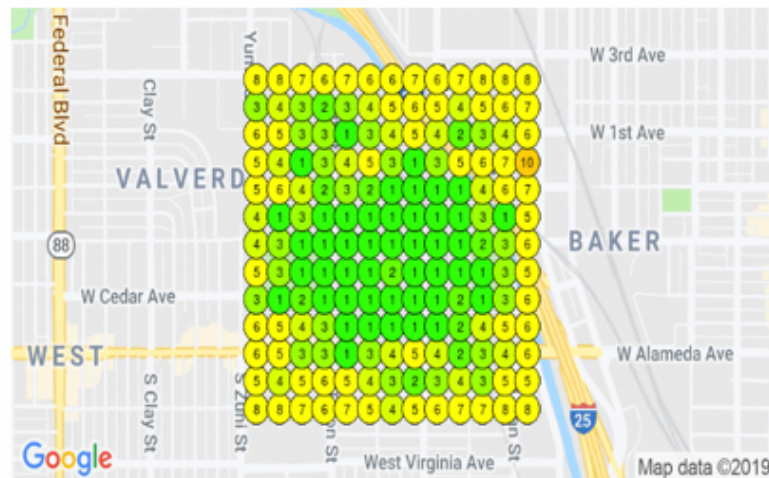

The process of building a local marketing campaign has never been easier. Do you know that more than 70% of clicks go to Google's 3-Pack? On the local map of your market area, you want to have a number 1, 2, or 3 as shown below.

We recommend showing you the before and after photos and letting them speak for themselves. BroadLocal is a 100% managed service. The setup fee and monthly management fee are both less than what you would pay a staff member to do it.

Before **GPS-Trac** Ranking

We provide a graphic representation of how you rank in your local market with our GPS-Grid System. Our analysis shows us what needs to be done for your company to be ranked among the top three.

After **GPS-Trac** Ranking

We can see from the GPS-Grid map that your ranking has improved in the all-important Google Local 3-Pack. The results will speak for themselves... **Drop the Mic!**
